

said auger including:

a core;

flighting connected to said core so that when said auger rotates, feed disposed within said enclosure is mixed;

said flighting including:

a first portion; and

a second portion staggered relative to said first portion such that movement of the feed between said first and second portions is interrupted.

Claims 42-47 (canceled)

Claim 48 (original)

48. A mixer apparatus for mixing livestock feed and the like, said apparatus comprising:

a container for the reception therein of the feed;

said container including:

a housing;

a wall extending away from said housing, said wall defining an opening disposed remote from said housing for the reception therethrough of the feed, the arrangement being such that said housing and said wall define therebetween an enclosure for the feed received through said opening;

an auger disposed within said enclosure, said auger having an axis of rotation extending through said housing;

said auger including:

a core;

flighting connected to said core so that when said auger rotates, feed disposed within said enclosure is mixed;

said flighting including:

a first portion; and

a second portion staggered relative to said first portion such that movement of the feed between said first and second portions is interrupted.
